## Introducer for an Insurance Broker

MRS� Enterprise is changing the perception of insurance brokers. The business is owned and run by experienced professionals with a track record of integrity and intelligent service. Our business advises on the best value insurance and arranges it for clients. We maintain contact with clients to advise them on risks as they develop throughout the year.

We are seeking to build a network of introducers. An **insurance broker introducer** is just that – it is an individual with a network of connections who introduces potential clients to the insurance broker. Recent changes mean that this role has no profile at all with the Regulator – it is simply an agreement between the broker and the introducer.

Acting as an introducer for MRS� Enterprise can be an excellent way to keep in touch with a business environment whilst on a career break with no schedule or commitment and very little change to your daily focus on your growing family. An insurance introducer simply keeps an ear out for people they come into contact with on a daily basis who have insurance needs and connect them with MRS� Enterprise. In return you will be paid a proportion of the commission that we earn from selling the insurance.

For us, people with families are ideal introducers. Your busy life will bring you into contact with a whole range of individuals and business owners – all of whom will have insurance needs.

If you would like to know more about becoming an Introducer, please contact:
